Please advise if this load can travel over linkspans at: and

Observations :

Thank you.

Procedure for Heavy Loads

Authorisation requests for the shipment of heavy loads are accessible 'Client' tab on our web site. In order to expedite these procedures, information as possible should be provided on the request form. Brittany Technical Services department reserves the right to request further information.

When complete, the request form should be renamed with your company's name and the date (eg ABC Transport DDMMYY) and sent to the following email address:

If your vehicle is travelling Southbound please send to freight.reservations@brittanyferries.com and if travelling Northbound please send to reservation.fret@brittany-ferries.fr

Once our Technical Services department have approved the shipment, liaise with our Reservations Department, who will promptly make contact regarding any specific loading procedures.

The ultimate decision rests with the ship's Captain, who may refuse to load heavy loads if conditions, such as weather, are unsuitable.

You are reminded that the safe lashing of the load to the trailer is your responsibility.

responsibility.
